EDUCATION

University of Kansas

Bachelor of Science, Mathematics

Bachelor of Science, Computer Science

Honors Program

GPA: 3.96/4.00

Relevant Coursework: Introduction to Operating Systems, Embedded Systems, Theory of Computing, Data Structures and Algorithms

Lawrence, Kansas

August 2024 - May 2028

August 2024 - May 2028

RELEVANT EXPERIENCE

Nonlinear Programming Algorithm Benchmarking

University of Kansas

- Benchmarked the runtime performance of nonlinear programming algorithms across simple, complex, and unbounded optimization problems using Python.
- Presented research at the GEA Research Showcase, earning an average rating of ~4/5.

ACM Tutor

University of Kansas

Volunteer

January 2025 - Present

- Helped students with calculus concepts and data structure implementations in Python.
- Over **150 hours** tutored across three semesters.

QuikTrip

Kansas

PT Clerk

March 2022 - January 2025

- Used strong interpersonal skills to assist customers and answer questions efficiently and professionally.
- Demonstrated adaptability by managing multiple tasks in a fast-paced environment.
- Utilized attention to detail to maintain store cleanliness and organization.

INVOLVEMENTS

KU Association for Computing Machinery (ACM)

University of Kansas

ACM Co-Chair

May 2026 - May 2027

- Co-lead ACM executive board of **10** officers, coordinating meeting planning and organizational priorities with co-chair.
- Plan and facilitate weekly meetings focused on technical workshops, professional development, and community building.

JavaScript Workshop

HackKU 2025 and 2026

- Taught peers how to use JavaScript along with HTML and CSS to make a website.
- Showed the implementation of a to-do list website that saved tasks to local storage.

PROJECTS

HackUTD 2025

- **Won Best Use of Vultr** at the **largest** 24-hour hackathon in North America.
- Made the data pipeline from Arduino to Raspberry Pi to Redis. Redis was run on a Vultr server.

HackKU 2025

- We **won the Best Use of Gemini API** of the 34 teams who ran for the track.
- Worked with a group to make a website that takes song titles or artist inputs to produce a playlist output.
- Helped connect Gemini API to Spotify API to a JavaScript function.

SKILLS

Technical

- Languages: Python, C, JavaScript, HTML, CSS
- Developer Tools: Git, REST APIs, Arduino, Raspberry Pi, Frontend Development

Professional

- Time Management: Proven ability to balance academic, work, and personal projects effectively.
- Problem Solving: Skilled in identifying and resolving challenges through analytical and creative approaches.
